jamesbaghurst@gmail.com

EDUCATION

University of Edinburgh

Edinburgh, UK *Class of 2021*

BA (Hons) Chinese and German

First class degree with distinction in spoken Chinese

WORK EXPERIENCE

RemNote Remote

Founding Frontend and AI Engineer

Nov 2021 - Present

- Responsible for the backend and prompt engineering for all of RemNote's AI projects
- Implemented advanced AI-enabled user interfaces such as RemNote's Flashcard Copilot
- Sole maintainer of RemNote's plugin system and API
- Code ownership over the flashcard system, the core of RemNote's product

PROJECTS

Flashcard Copilot RemNote

RemNote's Flashcard writing copilot for students

Jan 2023 - Present

- Implemented Copilot-style completions and Grammarly-style correctness checks for flashcards
- Developed RemNote's LLM request backend
- Built extensive prompt evaluation suites to ensure high quality completions
- Minimized latency using streaming and partial JSON parsing

Open Fresh Personal Project

🗘 Open source, AI-enabled meal planning and shopping.

Sep 2023 - Present

- Created an AI agent and UI to design personalized meal plans for users
- Used Selenium to autonomously add groceries to users' grocery website accounts
- Added support for smart ingredient substitution and recipe updates to handle missing ingredients

TypeScript Type Fixing Agent

Personal Project

Open source type error fixing agent for 100k+ line TypeScript codebases

Jan 2023 - Present

- Automated fixing type errors using an AI agent which makes PRs to your GitHub repository
- Added summaries of error fixing attempts so failures still help human coders fix the error
- Utilized TypeScript's compiler API to retrieve type information and provide context to the agent

AI Popper Personal Project

🜎 Open source chatbot for discussing the works of Karl Popper and David Deutsch

Sep 2023 - Present

- Created text embeddings from YouTube video transcripts
- Used hypothetical document embeddings to improve embedding retrieval quality
- Supported the ElevenLabs streaming API to read responses aloud in the voice of David Deutsch

Chat with Channel Personal Project Sep 2023 - Present

- Open source, user-friendly framework for creating YouTube channel chatbots
- Answers provide precise footnote references to relevant clips from the channel

• Minimal configuration required so non-technical users can use it

Contributions to Modelfusion

Personal Project

Open source TypeScript library for building multi-modal AI applications

Nov 2023

• Added support for SQLite vector search databases
